

FLP-25-T1-VSF/1

SPD - for low voltage / SPD type 1 / Combination type - T1 (25 kA)

Combined lightning current arrester with integrated backup fuse

pluggable module, visual fault signalling, module locking, remote fault signalling

- one-pole high performance lightning current arrester without follow current
- coordination with SPD Type 2 (SLP-275 V) even without surge separating inductors
- installation at the boundary of zones LPZ 0 and LPZ 1 or higher, mainly to main distribution boards
- zero leakage current
- for protection against impact of direct or indirect lightning strikes in wide range of applications – office and industrial buildings
- with integrated backup fuse
